Actividad Evaluable: Repositorio

Para crear el repositorio primero se creó un repositorio vacío en Github:

Después se creó una carpeta que iba a contener todos los archivos que se subirían al repositorio en mi computador:

Después desde la terminal se inicializó el repositorio de git dentro de esa carpeta y se creó la rama remota para poder subir los archivos, se agregaron los archivos y se hizo el commit a main:

```
retoAnalitica — -zsh — 80x24
hint:  git branch -m <name>
Initialized empty Git repository in /Users/paofernandez/Documents/Escuela/HerramientasComp/retoAnalitica/.git/
(paofernandez@Paos-MacBook-Air retoAnalitica % git commit -m "JupiterNotebook exercises"
On branch master

Initial commit

Untracked files:
  (use "git add <file>..." to include in what will be committed)
        Herramientas Intro.ipynb

nothing added to commit but untracked files present (use "git add" to track)
(paofernandez@Paos-MacBook-Air retoAnalitica % git add .
(paofernandez@Paos-MacBook-Air retoAnalitica % git commit -m "JupiterNotebook exercises"
[master (root-commit) d635310] JupiterNotebook exercises
 1 file changed, 163 insertions(+)
 create mode 100644 Herramientas Intro.ipynb
(paofernandez@Paos-MacBook-Air retoAnalitica % git branch -M main
(paofernandez@Paos-MacBook-Air retoAnalitica % git remote add origin git@github.com:paofgz/retoAnalitica.git
(paofernandez@Paos-MacBook-Air retoAnalitica %
```

Finalmente se hizo el push al repositorio y se agregaron los archivos

```
retoAnalitica — -zsh — 80x24
(use "git add <file>..." to include in what will be committed)
        Herramientas Intro.ipynb

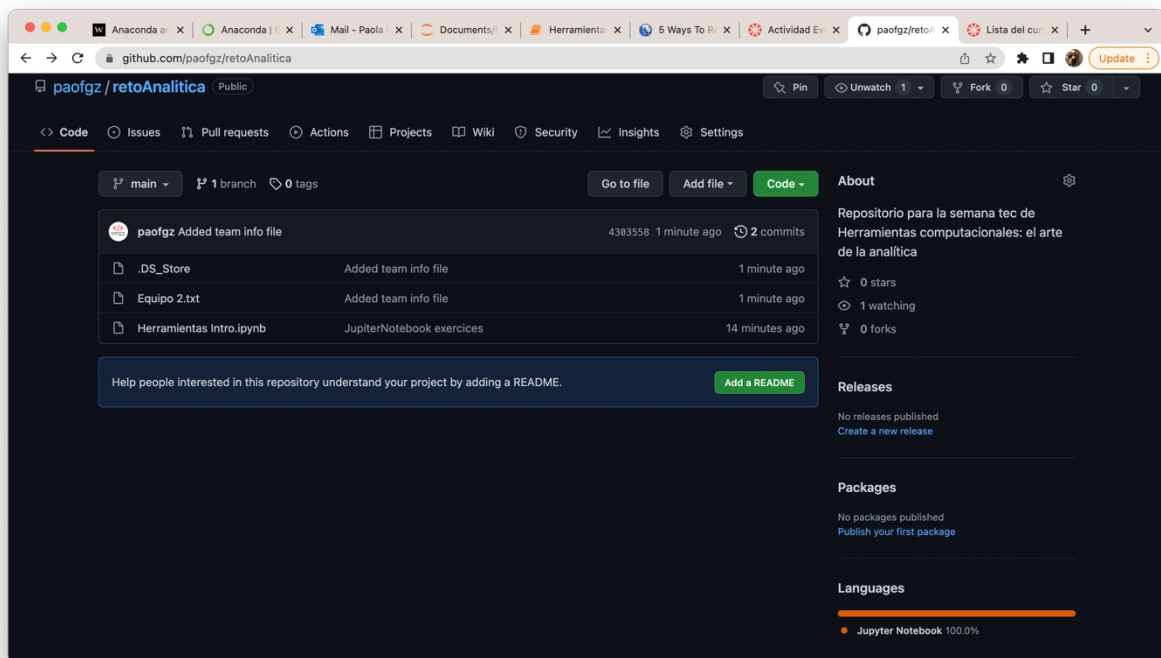

nothing added to commit but untracked files present (use "git add" to track)

Posteriormente si se desea agregar nuevos archivos solo se deben agregar a la carpeta y hacer los commits y los push al repositorio y se verán reflejados:

```
retoAnalitica — -zsh — 80x24
